

Air quality warning ended for Cranbrook

October 31, 2025

The Ministry of Environment and Parks in collaboration with the Interior Health Authority has ended the air quality warning that was issued October 30, 2025 for Cranbrook due to elevated concentrations of fine particulate matter.

Local air quality has improved due to changing meteorological conditions.

Open burning restrictions remain in effect

Visit the provincial [air quality data webpage](#) for real-time observations.

More information

The provincial air quality objective for $PM_{2.5}$ is 25 micrograms per cubic metre ($\mu g/m^3$) averaged over 24 hours. 24-hour average $PM_{2.5}$ concentrations are summarized below for Cranbrook and nearest monitored communities at 06:00 PM local time today:

Community	Castlegar	Cranbrook	Elkford	Golden	Sparwood
24-hr average ($\mu g/m^3$)	12.8	16.2	7.7	26.1	9.8
