## Air quality warning ended for Quesnel

**November 5, 2025**

---

The Ministry of Environment and Parks in collaboration with the Northern Health Authority has ended the Air Quality Warning that was issued on November 04, 2025 for Quesnel due to elevated levels of fine particulate matter.

Local air quality has improved due to changing meteorological conditions.

### More information

#### Current conditions

The provincial air quality objective for PM<sub>2.5</sub> is 25 micrograms per cubic metre ( $\mu\text{g}/\text{m}^3$ ) averaged over 24 hours. 24-hour average PM<sub>2.5</sub> concentrations are summarized below for Quesnel and nearest monitored communities at 5:00 PM local time today:

| Community                                  | Quesnel | Prince George | Williams Lake |
|--|---------|---------------|---------------|
| 24-hr average ( $\mu\text{g}/\text{m}^3$ ) | 9.0     | 9.2           | 5.0           |

Visit the provincial [air quality data webpage](#) for real-time observations.
