Air quality warning and open burning restrictions ended for Kamloops

November 4, 2025

The Ministry of Environment and Parks in collaboration with the Interior Health Authority has ended the Air Quality Warning and open burning restrictions that were issued on November 03, 2025 for Kamloops due to elevated levels of ground level ozone.

Local air quality has improved due to changing meteorological conditions.

More information

- The provincial air quality objectives for ozone is an eight-hour objective of 62 parts per billion (ppb) and a one-hour average of 82 ppb for air quality advisories. Air quality advisories for ground-level ozone may be issued when current concentrations exceed or are expected to exceed either of these objectives.
- The 8-hour average ozone concentration and 1-hour maximum concentration (within the past 8 hours) are summarized below for Kamloops and nearest monitored communities at 10:00 AM local time today:

Community	Kamloops	Quesnel	Williams Lake
8-hr average (ppb)	0.6	1.6	3.5
Max. within 8 hr (ppb)	2.0	3.1	6.2

Visit the provincial [air quality data webpage](#) for real-time observations.
